

SAHIL D PALEJA

Mumbai, India | +91 8369973229 | sahilpaleja27@gmail.com | linkedin.com/in/sahil-paleja

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with **1 year of professional experience** and **9 months of internship experience** in **BI reporting, data operations, workflow automation, and data analytics**. Skilled in designing KPI dashboards, performing cohort analysis, building automated data extraction and transformation workflows, and delivering actionable insights that drive measurable business outcomes. Proficient in **SQL, Power BI, Zoho Analytics, Python, Alteryx, and Excel**.

TECHNICAL SKILLS

BI & Visualisation:	Power BI, Zoho Analytics
Data Engineering & ETL:	SQL, Alteryx, Python, data extraction & transformation workflows, AppScript
Spreadsheet & Reporting:	Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP, formulas, macros), Google Sheets
Analytics & Methods:	Cohort Analysis, KPI Tracking, Inventory Analytics, Trend Analysis, Ad-hoc Reporting, Data Modelling
Data Operations:	Data cleaning, data validation, data quality checks, data reconciliation, data governance, documentation
Stakeholder Management:	Cross-functional collaboration, requirements gathering, dashboard development, process optimisation

PROFESSIONAL EXPERIENCE

Everest Fleet Private Limited — Data Analyst, BI & Data Team

Apr 2025 – Present

Mumbai, India

- **Cohort Analysis & Business Impact:** Designed and executed a cohort analysis identifying a high-performing driver segment; post-implementation of the revised incentive scheme delivered a **30% increase in operational efficiency and earnings** alongside a measurable reduction in driver attrition.
- **Automated Reporting (2 Days → 1 Hour):** Built end-to-end automated data extraction and transformation workflows using SQL and Alteryx, compressing a **2-day manual reporting cycle to under 1 hour (~92% faster)**, eliminating data entry errors and freeing analyst capacity.
- **Inventory Aging & Capital Optimisation:** Developed an Inventory Aging Summary with Days-of-Holding metrics, delivering full visibility into blocked capital and slow-moving stock; directly contributed to a **>50% reduction in dead inventory** and improved working capital efficiency.
- Design and maintain KPI dashboards in **Power BI** and **Zoho Analytics** covering fleet utilisation, operational health, and performance metrics for senior leadership and cross-functional stakeholders.
- Perform daily data quality checks, validation, reconciliation, and data governance across multiple source systems to maintain accurate and consistent reporting.
- Collaborate with operations, finance, and fleet teams to gather requirements, translate business needs into analytical solutions, and deliver structured, decision-ready datasets.

DCYBER Private Limited — Data Analyst Intern

Dec 2024 – Mar 2025

Mumbai, India

- Built Power BI dashboards for KPI tracking and real-time operational performance monitoring across business teams.
- Designed and automated data processing and validation workflows, **reducing manual effort by 30%** and improving data reliability.
- Prepared and standardised datasets for reporting cycles, ensuring data completeness, consistency, and governance readiness.

RE Journal — Research & Data Analyst Intern

Aug 2024 – Nov 2024

Mumbai, India

- Collected, cleaned, and analysed large volumes of real estate market data using Python and Excel to support research and publication workflows.
- Produced interactive dashboards and trend reports in Power BI that surfaced market patterns and informed editorial and business strategy decisions.

Null Class — Data Analyst Intern

Oct 2024 – Dec 2024

- Developed analytics dashboards to monitor campaign KPIs and social media engagement metrics.
- Delivered data-backed insights and trend analysis that **improved campaign effectiveness by 20%**.

PROJECTS

Cohort Analysis — Driver Incentive Optimisation — Segmented driver data into behavioural cohorts; applying findings drove a 30% uplift in efficiency and earnings with reduced attrition. Tools: SQL, Power BI, Zoho Analytics.

Automated Reporting Pipeline — Automated multi-source data extraction and transformation replacing a 2-day manual process; delivery cut to under 1 hour with zero manual errors. Tools: SQL, Alteryx, Zoho Analytics.

Inventory Aging Summary & Days-of-Holding Dashboard — Dashboard exposing slow-moving stock and blocked capital; insights led to >50% reduction in dead inventory and improved capital allocation. Tools: SQL, Power BI, Excel.

DataCraft — No-Code Data Science Platform — Web application enabling non-technical users to upload datasets, apply ML models, and generate automated visualisations without writing code. Tools: Python, Scikit-learn, Streamlit.

HR Analytics Dashboard — Power BI dashboard tracking employee attrition patterns and workforce trends to support HR planning and data-driven decisions.

Twitter Analytics Dashboard — Power BI dashboard monitoring social media engagement and performance metrics to guide content and campaign strategy.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning <i>Dwarkadas J. Sanghvi College of Engineering</i>	2022 – 2025
Diploma – Computer Engineering <i>KJ Somaiya Polytechnic</i>	2019 – 2022

CERTIFICATIONS

Google Analytics • Cisco Data Analytics Essentials • Alteryx Data Analytics • Postman API Fundamentals
